Your #1 Rating Leak: Material Loss

Deterministic analysis (Stockfish + fixed heuristics). No invented insights.

Why this keeps happening

Your pieces were left on squares where the opponent could fork two at once, winning material.

Do you win the games you should win?

You converted your advantage in 78% of games where you achieved a significant advantage.

Where things first went wrong

Game 1, move 9 (Black): b6.

This is the first time your move caused a large evaluation drop in the opening (per your report rules).

Your most damaging patterns

1. Fork Exposed (D)

Your pieces were left on squares where the opponent could fork two at once, winning material.

2. Pin Exposed (D)

Your piece was pinned against a more valuable piece behind it, restricting your options and costing material.

3. Skewer Exposed (D)

Your high-value piece was attacked and forced to move, leaving the piece behind it to be captured.

Examples from your games

#	Opponent	Date	Result	Blunders	Inaccuracies
4	Jamaicanknights	2026.09.01	0-1	1	0
11	Ugly1-2	2026.09.02	1-0	2	2
3	Abhinav_aggarwal	2026.09.01	0-1	0	1
