Your #1 Rating Leak: King Safety

Deterministic analysis (Stockfish + fixed heuristics). No invented insights.

Why this keeps happening

Your move allowed a forced checkmate that a different move would have stopped.

One number to watch

You converted your advantage in 78% of games where you achieved a significant advantage.

Where things first went wrong

Game 1, move 9 (Black): b6.

This is the first time your move caused a large evaluation drop in the opening (per your report rules).

Your most damaging patterns

1. Mate Threat Missed (D)

Your move allowed a forced checkmate that a different move would have stopped.

2. King Safety - Shelter Weakened (D)

You allowed pawn advances near your king that shattered your defensive shelter.

3. Back-Rank Weakness

Your king had no escape square (no luft), enabling decisive back-rank threats.

Examples from your games

#	Opponent	Date	Result	Blunders	Inaccuracies
4	Jamaicanknights	2026.09.01	0-1	1	0
11	Ugly1-2	2026.09.02	1-0	2	2
3	Abhinav_aggarwal	2026.09.01	0-1	0	1
